

Exchange Meeting with Guangzhou Customs in China

In December 2022, JTEKT participated in an exchange meeting with Guangzhou Customs, held by the Japan Auto Parts Industries Association!
(In 2022, an exchange meeting will be held with Beilun Customs and Hangzhou Customs)

Purpose
To improve prohibition accuracy of counterfeit products at customs by providing corporate/product information of participating companies, and the authenticity assessment points to customs officers.

As well as explaining the above information to customs, we introduced an application which allows for simple authenticity assessment just by reading a QR code on the bearing box.
